

## Annotation Type TLS

---

```
@Retention(value=RUNTIME)
```

```
@Target(value=FIELD)
```

```
public @interface TLS
```

“ 基于线程本地变量的BTrace字段 ” 注解

BTrace字段被存储在 “ 线程本地存储 ” 中

Annotation for thread-local BTrace fields. BTrace fields annotated with this annotation are stored in thread local storage. Field get/set are transparently converted to thread local get and set respectively.

### ***Important!!!***

It is not possible to access the data stored in the thread local storage from any other handler than OnMethod
